Emoji-Based Music Player

A fun Python project that detects your emotion using emojis and plays a matching song in your browser!

Features

- Detects emotion from emoji input
- Plays a song based on mood
- Simple and beginner-friendly
- Uses Python's built-in webbrowser module

Technologies Used

- Python
- webbrowser module

How It Works

1. User enters an emoji
2. Program matches emoji to an emotion
3. Corresponding song is played in browser

How to Run

1. Install Python (if not installed)
2. Copy the code into a .py file
3. Run the file: `python emoji_music_player.py`
4. Enter an emoji when prompted

Example

Input:

😊

Output:

Detected Emotion: happy

Playing your song... 🎶

Limitations

- Limited emojis supported

- Requires internet connection
- Only one song per emotion

Uses in the feal world scenario

1.Mood-Based Music Recommendation

- Suggests songs based on user emotion
- Makes music discovery faster and personalized

2.Quick and Easy Music Selection

- No typing required—just use emojis
- Saves time and effort

3.Mental Health Support

- Plays calming or uplifting music
- Helps reduce stress, anxiety, or sadness

4.Personalized Playlists

- Automatically creates playlists based on mood
- Improves listening experience

5.Social Media and Chat Integration

- Suggests songs from emojis in chats
- Makes conversations more interactive

6.Smart Car Music Control

- Drivers select emoji for instant music
- Reduces distraction while driving

7.Gaming Experience Enhancement

- Changes background music based on mood
- Increases immersion in games

8.AI Assistant Integration

- Detects mood via emoji or voice
- Plays suitable music automatically

9.Accessibility Support

- Easy for users who prefer emojis over text
- Helpful for quick communication

10.Smart Home Systems

- Syncs music with mood (lights + sound)
- Creates better ambiance

11.Educational & Project Use

- Useful for coding projects and hackathons
- Demonstrates logic + creativity

12.Fitness & Workout Apps

- Plays energetic or calm music based on mood
- Enhances workout performance
