Emoji-Based Music Player

A fun Python project that detects your emotion using emojis and plays a matching song in your browser!

Features

- Detects emotion from emoji input
- Plays a song based on mood
- Simple and beginner-friendly
- Uses Python's built-in webbrowser module

Technologies Used

- Python
- webbrowser module

How It Works

1. User enters an emoji
2. Program matches emoji to an emotion
3. Corresponding song is played in browser

How to Run

1. Install Python (if not installed)
2. Copy the code into a .py file
3. Run the file: `python emoji_music_player.py`
4. Enter an emoji when prompted

Example

Input:

😊

Output:

Detected Emotion: happy

Playing your song... 🎶

Limitations

- Limited emojis supported

- Requires internet connection
- Only one song per emotion
